[redacted]

25X1

--See Tab A for DCI personal decision on this one. Understand many phone calls, much consternation, etc., both before and after. Am told this was not what you expected (?) [redacted] is concerned about possible negative impact on Agency. (Since offered up something, might be taken anyway.) Understand DCI decided to undercut [redacted] who is working on own mysterious agenda (?)

DRB Session

--See Tab B for talking points the DCI composed himself and MFR on results of this session.

Committee Conference

--IC Staff thought you and [redacted] wanted Gates there; they decided to ask him as C/NIC designee so as not to give CIA two representatives. When they knew [redacted] would still be around, they thought he should be invited, too. I told [redacted] that Bob Gates should be there as NFIB rep and [redacted] would not be an appropriate participant. You may need to confirm or deny.

[REDACTED]

-- [REDACTED] advises that they are having problems getting Community members to ante up lists of "critical computer systems." They may need you to intercede to get people to come forth. General Williams has already requested to speak to you before letting [REDACTED] group proceed any further. Concern seems to stem around two areas: 1) This could be a witch hunt looking for systems that are not handled properly and, therefore, will no longer be provided sensitive information. 2) Why do systems other than the DDO's manage to handle compartmented information without having any problems while the DDO continues to fight being included in any system. Either the systems are doing something right that DDO could capitalize on or they don't know something that DDO knows.
